I am Co-Founder at Nums AI and a second-year M.S. student in Electrical Engineering at KAIST, conducting research at the DataAI Lab under the supervision of Prof. Jaemin Yoo and Prof. Kijung Shin. My research focuses on machine learning for structured data, including graphs, time series, and tabular data, with a recent focus on foundation models.

Outside academia, I have co-founded and worked as a software engineer and designer in multiple startups, building products around foundation models, LLM-powered workflows, finance, and mobile applications.

Education

M.S. in Electrical Engineering, KAIST

2025 - Present | Advisor: Prof. Jaemin Yoo and Prof. Kijung Shin | Daejeon, Republic of Korea. GPA: 3.95.

B.S. in Electrical Engineering and Computer Science, KAIST

2019 - 2024 | Double major. Daejeon, Republic of Korea. Cum laude, GPA: 3.77.

Models

Causilo | Nums AI

A tabular foundation model for classification and regression.

Work Experience

Co-Founder and CTO

Nums AI | Seoul, Republic of Korea | Apr 2026 - Present

Co-founded Nums AI to build tabular foundation models for structured data and leads technology strategy and engineering as CTO.

Founding Engineer & Designer

Pensive | Berkeley, CA | Nov 2022 - Aug 2023

Co-founded a US-based startup with two UC Berkeley students and worked across engineering and product design for LLM-powered workflow tools. Built Pensive Extension for real-time note taking from Chrome highlights and Pensive Notes for Zoom transcription and automatic meeting notes, which was used by 3 organizations.

Korean Augmentation to the United States Army (KATUSA)

US Army | USAG Humphreys, Republic of Korea | Nov 2021 - May 2023

Served as a KATUSA at Bravo Company, 602nd Aviation Support Battalion, 2nd Combat Aviation Brigade, 2nd Infantry Division. Supported communication and coordination between US and Korean personnel while serving as the only KATUSA in the largest company of the unit.

Founding Engineer & Designer

LayUs | Seoul, Republic of Korea | Mar 2022 - Jul 2022

Built a mobile application for exhibition visitors to upload ticket information and redeem F&B coupons. Contributed to product implementation for a ticket-based redemption workflow connecting cultural events with local customer benefits.

Co-Founder, Software Engineer & Designer

WARD | Daejeon, Republic of Korea | Sep 2020 - Oct 2021

Co-founded and built a machine learning-based stock information service. The team was selected as one of the top 12 teams in 2021 E*5 KAIST under Blue Point Partners mentorship, launched a private beta with 200+ users, and gathered feedback through fund manager sessions, interviews, and surveys.

Industrial Project

Graph-Based Tracking of News Propagation on Social Media Using LLMs

National Cyber Security Research Institute | Republic of Korea | 2025

Worked on an industrial research project for graph-based tracking of news propagation on social media using LLMs.

Teaching Experience

Teaching Assistant, Programming Structures for Electrical Engineering

EE209, KAIST | Spring/Fall 2025

Developed a data structures programming assignment with auto-grading for 200+ Electrical Engineering majors each semester.

Teaching Assistant, Foundation of Big Data Analytics

EE412, KAIST | Fall 2025

Supported course operations and instruction for Foundation of Big Data Analytics.

Selected Awards & Honors

Sep 2026 Outstanding Master's Student Scholarship, KOSAF (₩2.5M/semester)

Jun 2024 2024 Team KAIST Global Challenge Program, \$15,000 funding

Oct 2023 2nd place, 2023 Korea SW Startup Ideathon, ₩1.5M prize

Apr 2023 1st place, 8th Army ROKA Support Group Insignia Competition

Nov 2022 2nd place, Art Service Follow-up Growth Support Project, ₩20M prize

Sep 2021 One of 12 finalists, E*5 KAIST

Apr 2021 1st place, Creative Space G A.I & IoT Hackathon, ₩1M prize
